

MPB 1400 Timer Traffic Lights

MPB 1400 Timer Traffic lights are a low cost timer controlled traffic lights system that can be used to control two-way, three way (side street) and four way (cross roads) alternating traffic flow.

Settings for the traffic lights are adjusted on-site using a secure infra-red remote control and is simple to use.

MPB 1400 traffic lights are not NZTA approved and are only appropriate to be used in a construction, forestry or on privately owned land such as car parks.

Description

- Rapid and safe single person deployment
