

VMS Colour Board (Large)

The Variable Message Sign (VMS) boards can display a range of messages, symbols and animations in multiple colours. However orange is the only colour approved for use on the road reserve. Colour may be used for promotional or sales campaigns where the VMS board is placed in private property.

Delivered to your site or specific location within 24 hours. Photo of installation sent on completion of delivery showing correct message and location. Messages can be updated remotely.

Ideal for:

- Road Safety Messages
- Detour or road closure information
- Traffic Information
- Speed Advisory (can be hooked up to radar)
- Special events

Solar powered so never runs out of juice, and remote controlled by PC, SMS or over the internet. Can also include camera connectivity for live streaming and device security.
